

Drug Companies manufacturing Active Pharmaceutical Ingredients (APIs) and formulations are in a highly sensitive business. Stringent quality control measures need to be in place as any error in the formulation of a drug can lead to financial losses and even cost somebody's life. In addition, increased regulatory compliances make the need for a MES solution very critical for all pharmaceutical companies in the API and formulations business.

MESTECH Solutions

Regulatory bodies like FDA, EMEA impose stringent compliance requirements, which if not adhered to, can result in the shutdown of a plant leading to financial and legal implications.

Due to current manual processes, the probability of errors increases substantially; leading to very high chances of re-call which can cost a company millions of dollars. In addition, the review cycle time to release a batch without an automated system is very long, thus increasing time to market.

These risks can be mitigated with the right MES solution. Rockwell FactoryTalk® Pharma Suite and PMX MEST™ solutions help fulfill compliance requirements. The dependency on manual processes is greatly reduced leading to improved quality, reduced time to market and lower costs.

Business Benefits

- Meet Compliance requirements
- Reduced Time to Market
- Improved product quality
- Reduced Batch Review cycle time
- Paperless Recipe Management
- MES processes implementation by Industry experts

Feature Description

MESTECH ensures that Rockwell FactoryTalk® Pharma Suite and PMX MEST™ solutions are implemented and supported end to end.

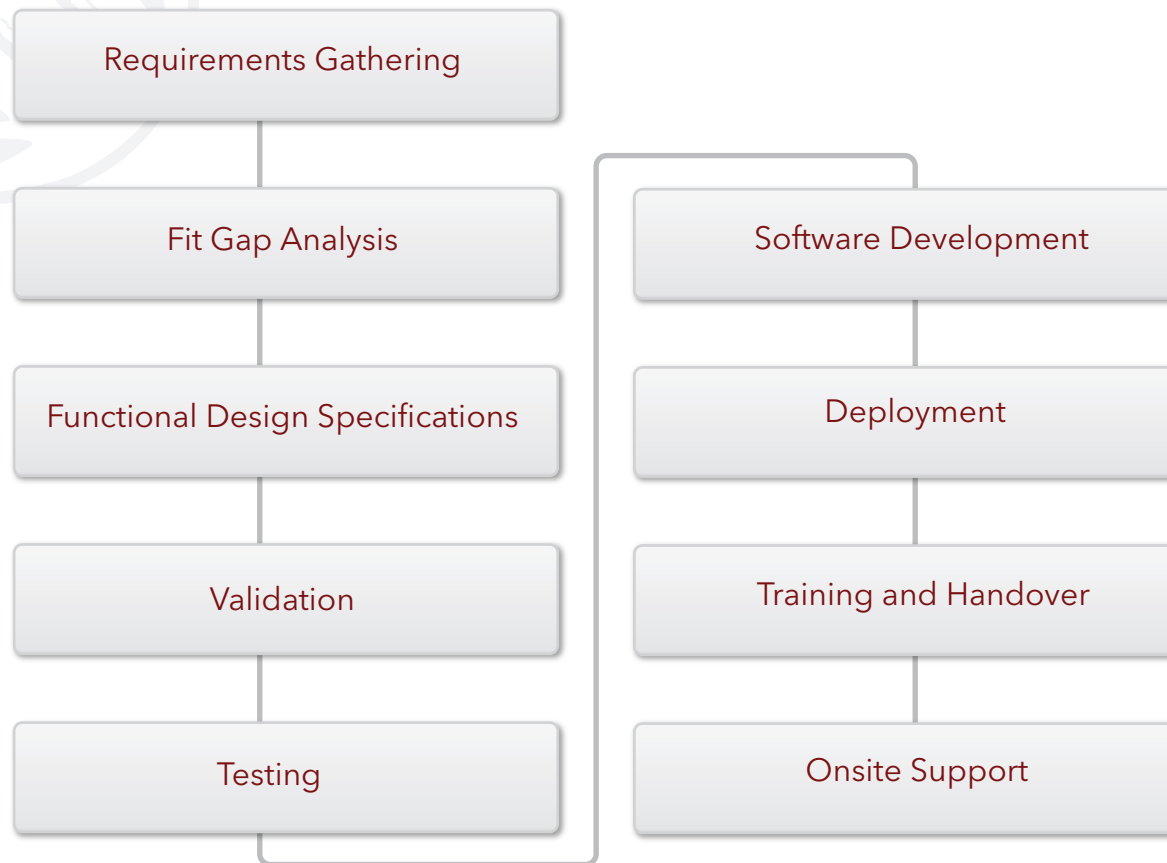

Our range of services include

- Systems Development Life Cycle
- Deployment and Onsite Support
- Recipe Modeling and Authoring
- Consulting
- Data Migration
- Post Go Live Support
- Product Training

How it Works

As a Rockwell Automation Enterprise Solution Partner, MESTech is committed to the successful deployment of a comprehensive “production management and manufacturing intelligence” class of FactoryTalk Enterprise level solutions.

Our SDLC process includes:

About

MESTECH Services Pvt. Ltd. is a technology company which delivers value through efficient operational solutions. MESTECH has a strong foundation in automating business operations and successfully delivering technology consulting services to Automotive and Life Sciences majors with focus around implementing manufacturing execution systems. Our information security specialists have proven expertise in Vulnerability Assessment & Penetration Testing.
